Superintendent Pedro Ramos

I understand that 2 of the ORV committee members are active Anti ORV use people. I have received a few complaints about this. I do not know Laurie Mcdonald well enough to comment on her and I have only spoken to John Adormato a couple of times and both are knowledgeable and I think that they are okay but the fact is that the ORV committee was not supposed to have any members on it that were involved with litigation with the NPS unless there were no other people to form the committee and this committee was formed and a well rounded committee before they forced themselves upon it. These two are part of the groups that are actively involved with the Bear Island litigation and thus violating the NPS's on policy and they should not be on the committee.

The NPS has already used the Bear Island litigation as an excuse to table the airboat access that we had worked on and should have been opened over a year ago.

Thank You

Eric Kimmel
